

ONE DEAD MAN

“One Dead Man” is the story of the working man. For 30 plus years you toil away only to end up six feet under the ground (figuratively). In the end, you’re lucky if you don’t wind up with a bunch of people standing around, just waiting to see ‘how much they get out of you’. It’s the story of life. But that’s what gives it universal appeal. Kind of a folk-rock song. Easy singing and easy listening. Why not give it a try.

“I can see it all now, the day after I die
Everyone standing around, pretending to cry
Crossing their fingers, just waiting to see
How much they get out of me
Well, it would sure be fun if I could have my way
I’d stand right up and look at them and say
What are all you people doing standing around
When I’m six feet under the ground”
